## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 3, line 2, it is unclear where the structural limitation is in this apparatus claim.

There is no recitation limiting the structure of the flange in this claim.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by German

Patent 90,977.

In regard to claim 1, German Patent 90,977 discloses a flange D (fig. 1) comprising a bearing surface (portion of D that contacts C) ("for engagement by a clamping jaw of a joining pipe" is considered intended use language because the preamble is drawn only to the flange and not the flange in combination with the clamping jaw), said bearing surface being curvedly beveled towards the joint pipe (see the flange D in fig. 1, the beveled surface of D initially curves

away from the pipe wall at the point where the inner most point of C contacts D and the flattens out to a conical surface further outward in the radial direction).

In regard to claim 3, the claim is drawn only to the flange and not the flange in combination with a clamping jaw or the forces generated by the geometry of the clamping jaw. German Patent 90,977 discloses all of the recited structural limitations relating to the flange.

*Response to Arguments*

6. Applicant's arguments filed 5/9/08 have been fully considered but they are not persuasive.

In regard to the 112 2nd paragraph rejection of claim 3, the Applicant has failed to address the issue that claims 3 fails to further limit the flange of claim 1.

In regard to claim 1, German Patent 90,977 discloses a curvedly beveled flange as described in better detail in the prior art rejection section above.

*Conclusion*

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David E. Bochna whose telephone number is (571) 272-7078. The examiner can normally be reached on 8-5:30 Monday-Thursday and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on (571) 272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
